

POWER ENERGY
EAST AFRICA

ETHIOPIA

POWER ENERGY EXPO

AUGUST
14-16, 2026

Addis International Convention Center
Addis Ababa, Ethiopia

OVERVIEW OF ETHIOPIA

Ethiopia is one of Africa's fastest-growing economies and a rising hub for renewable energy development. With vast natural resources, expanding infrastructure, and strong government backing, the country is committed to becoming a major regional energy exporter.

ABOUT THE EVENT

Ethiopia Power Energy Expo 2026 brings together global manufacturers, suppliers, distributors, and decision-makers from the power, energy, electrical engineering, renewable technology, and infrastructure sectors. The event serves as a powerful platform for international companies to connect with Ethiopia's rapidly expanding energy market — one of the most promising destinations in East Africa.

The exhibition promotes cooperation between Ethiopia, the East African region, and the global power industry by enabling business networking, product showcases, and knowledge exchange in the fields of renewable energy, power generation, electrical equipment, transmission & distribution, and industrial technologies.

MARKET HIGHLIGHTS

- Large-scale national electrification programs underway, with major investments in hydropower, solar, wind, and geothermal
- Government incentives for foreign investors, Increasing private and foreign investment opportunities
- Ongoing expansion of transmission & distribution networks
- Strong focus on renewable energy development, with 45,000mw+ renewable energy potential
- Strategic location connecting East African energy markets

MARKET SCENARIO

Ethiopia is one of Africa's fastest-growing economies and a rising hub for renewable energy development. With vast natural resources, expanding infrastructure, and strong government backing, the country is committed to becoming a major regional energy exporter.

Ethiopia generates most of its power from hydropower but is rapidly diversifying into solar and wind to meet rising demand. With industrialization, urban growth, and economic expansion, the government aims to boost power generation capacity, upgrade grid reliability, and attract global investors.

Ethiopia has one of the cleanest power grids in the world. Currently, Ethiopia has approximately 5,250 MW of installed generation capacity with plans to increase its power generation capacity to 17,000 MW in 10 years—both to serve its growing domestic demand and to export to other African countries.

For the past few years, the Government of Ethiopia (GOE) has been gradually increasing electricity access for its population by expanding its transmission network and encouraging power generation through public-private partnerships (PPPs) and power purchase agreements with independent power producers.

In February 2025, the Ethiopian government signed a Memorandum of Understanding (MoU) with the African Trade Insurance Agency (ATIDI) to attract foreign investment in renewable energy. The agreement aims to strengthen power purchase agreements and improve Ethiopian Electric Power's creditworthiness by using ATIDI's Regional Liquidity Support Facility.

The MoU aims to support Independent Power Producers and Public-Private Partnerships by reducing financial risks. The MoU is part of Ethiopia's strategy to diversify its hydropower-heavy energy mix with wind, solar, and geothermal sources, making the energy sector more resilient and investor-friendly.

YOUR GATEWAY TO ETHIOPIA'S EXPANDING POWER & ENERGY INDUSTRY !

Power Energy Expo is your direct path into Ethiopia's advancing power and energy market, connecting you with emerging opportunities and new possibilities.

WHO WILL YOU MEET?

EXHIBITOR PROFILE

Power Generation & Transmission Equipment

Solar Energy Systems & Solar Products

Renewable Energy Solutions

Generators (Diesel, Gas & Hybrid)

UPS / Inverters / Batteries & Energy Storage

Transformers & Switchgear

Cables & Wiring Accessories

Smart & Green Energy Technologies

Power Tools & Industrial Electricals

LED Lighting & Smart Lighting Systems

Electrical Components & Automation

Security & Surveillance Systems

CCTV / Access Control / IT Solutions

Energy Efficiency & Power Management Solutions

Engineering, Procurement & Construction Service Providers (EPCs)

HVAC & Cooling Solutions / Industrial Ventilation Systems

Smart Metering, Smart Cities & IoT Technology

Testing, Measurement & Calibration Services

Electrical Safety, Tools & PPE

Industrial Machinery & Automation for Power Sector

Insulation Material

PV Module

Thermal Power

VISITOR PROFILE

Electrical contractors, EPC firms & utility providers

Power generation & distribution companies

Importers, distributors & resellers of electrical products

Solar and renewable energy developers

Engineers, technicians & project consultants

Government departments & public sector units

Industrial buyers, factories and commercial establishments

NGOs, investors & international trade bodies

On-site Power and Back-up Power Dealers/ Distributors

Independent Power Producers

Interior/Lighting Designers

Original Equipment Managers (OEMs)

About the Organiser

SYNERGICE EVENTS is an exhibition & event organizer and business management consultancy. We cater the Indian and global industry, by providing them cost effective & innovative exhibitions and business networking events, to connect and engage with potential partners across the globe. We work in a holistic approach from conceptualization to execution of the event & business solutions to our clients, customers and exhibitors, so that they are fully satisfied with the objective of participation and gain maximum value & output of their investment of time and money. We believe in consistency, transparency, innovation and teamwork to support our customers & partners, so that we have & maintain synergizing business relations with them to go a long way together.

About the Venue

The Addis International Convention Center (AICC) stands out as a premier choice for large-scale business events and conferences, thanks to its modern, world-class infrastructure and strategic location. Spread over 40 hectares, it boasts two grand halls for 3,000–4,000 people each, along with eight smaller meeting rooms — together supporting up to 10,000+ attendees.
